Introduction

Bret Tremblay
Technical Manager

- 18+ Years Experience
- Land Development
- Aviation
- Civil 3D Tech Group Lead
- Drone Tech Group Lead
- 3D Modeling
- Augmented Reality Tools
- Implementation of A.I./M.L.

Benesch is a nationally recognized transportation, planning and design consulting firm with 1000+ professionals nationwide.

1,000+ EMPLOYEES | 46 LOCATIONS | 20 STATES | 1 TEAM

How Do Drones Benefit Benesch?

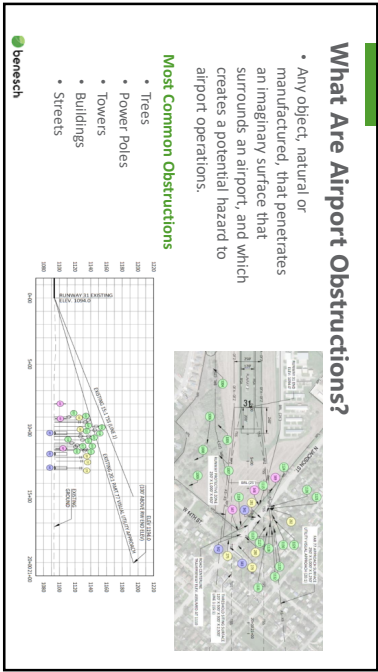

Possibilities are Endless!

- Enhanced Surveys & Inspections
- Safe Access
- High Quality
- Fast & Cost Effective
- Create 3D Models

6

Benefits of Drones at Airports

- Comprehensive/Full Coverage:** Able to get all obstacles that may exist, even if they weren't pre-identified before field investigation.
- Clash Detection:** Obstruction Models & Mesh That Can Be Compared for Clash Detection w/ Design Models
- Accurate:** Internal Studies have experienced accuracy w/ Drones ~ 0.20'
- Speed:** Typical Data Collection in Hours, not Days
- Data Set:** Collected information can be used for other projects.
- Time Stamp:** Compare to Future Collections.

Thermal Applications in Benesch

Current Thermal Use

- Bridge Deck Delamination
- Roof Inspections

Future Testing

- Bridge Steel Fractures & Stress
- Levee & Dam Leaks
- Utilities (i.e. Gas/Water Leaks)
- Environmental (i.e. Wetland Delineations)

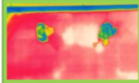

19

Thermal Benefits

Benefits

- Speed** – Able to scan a bridge with minimal lane closures or traffic control
- Safety** – The bridge inspection takes place away from the bridge in a safe location, never needing to enter active traffic.
- Accuracy** – Sensitivity to even slight temperature variations.
- Data Conversion**– Software able to digitize areas making for quicker deliverables.

Thermal Setup / Specs

Drone:

- DJI Inspire 1
- DJI Matrice

Imaging Unit(s):

- 13mm DJI Zenmuse XT v2.0 336 @ 30 Hz
- 13mm DJI Zenmuse XT v2.0 640 @ 30 Hz

20

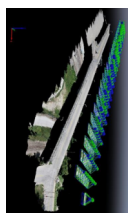

Thermal Drone – Why?

CHAIN DRAGGING

- PROS**
 - Simple
 - Low Investment
 - Tired & True
- CONS**
 - Subject to Inspectors' Hearing
 - QC/QA Challenge
 - Manual Reporting
 - Time Consuming

THERMAL DRONE

- PROS**
 - Digital Readings
 - Full Electronic Record of Field Inspection
 - Electronic Reporting
 - Fast & Higher ROI

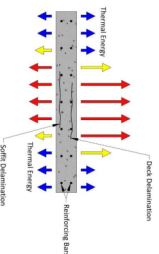

22

How Does It Work

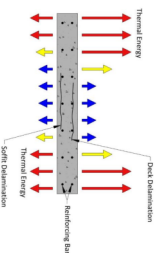

Day / Sun

Night / Moon

The drone infrared sensors detect the electromagnetic radiation and heat fluctuations that indicate anomalies in form of stress or damage.

Flight Planning

PRE-FLIGHT PLANNING

- Aimmap
- Processes FAA Airspace
- PIX 4D CAPTURE
- Pre-Flight Programming

PROCESSING & ANALYSIS

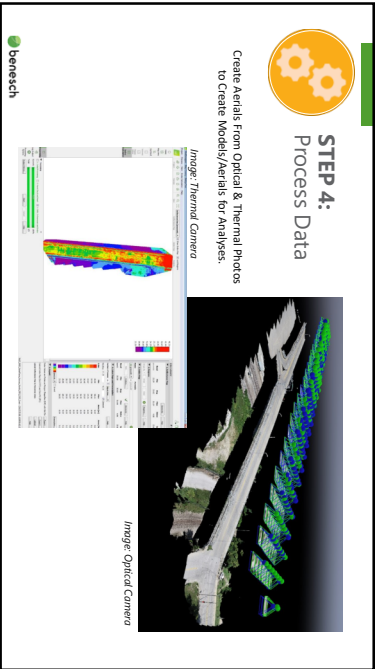

- FLIR Tools
- Analysis of individual Photos
- Pix4D Mapper & Context Capture
- Orthomosaic Aerial - Stitches Together Thermal Images by Photogrammetry
